<p>* Abbreviations: Hazard Ratio (HR); Confidence Interval (CI); Proportional hazards (PH); Referent (Ref); Transient Ischemic Attack (TIA); Emergency Department (ED); obstructive sleep apnea (OSA); Charlson Comorbidity Index (CCI); Acute Physiology and Chronic Health Evaluation (APACHE).</p> <p>† PH assumption test = proportional hazard assumption test. A p-value ≥.05 indicates that the hazard ratio is constant over time. A p-value < .05 indicates violation of the proportional hazard assumption for the model.</p> <p>‡Past Medical History variables identified by <i>International Classification of Diseases, 9th Edition</i> code.</p>
